This webinar will therefore use World AIDS Day to provide an update on the state of global HIV prevention and as a moment to mobilize renewed political and programmatic commitment to HIV prevention access, reinforcing the message that the 2030 targets can only be achieved if countries and communities can access, choose and use the prevention options that meet their needs.

Objectives

The webinar will:

- Provide an update on status of HIV prevention
- Facilitate a discussion on challenges and opportunities in accessing HIV prevention options
- Introduce the role of GPC+ in advancing access to HIV prevention

Draft Agenda
